Objective

Seeking a challenging position in data science to leverage my expertise in Python, C++, and machine learning. Aiming to contribute to innovative projects at the intersection of artificial intelligence and practical problem-solving in fields such as predictive analytics and intelligent systems.

Education

Institute	Qualification	Score	Duration
Bennett University	B.Tech in Computer Science	GPA: 8.5/10	2023–2027
Modern Era Public School	10+2 (CBSE)	87%	Apr 2023

Projects

- **Skill Bridge: [An intelligent system to suggest jobs and analyze skill gaps]** *December 2024 - March 2025*
  Tools: [Python, NLP (TF-IDF, Spacy), Scikit-learn, Flask, AWS] []
  - Developed a machine learning system to recommend relevant job roles by analyzing user resumes using NLP techniques.
  - Implemented TF-IDF vectorization and cosine similarity for efficient text analysis, achieving 85
  - Created a skill-gap analyzer that suggests tailored learning resources (Coursera, YouTube APIs) to improve employability.

- **ZapShield: AI-powered Cyber Threat Detection & Prevention Platform (SIH 2025)** *september 2025 – december 2025*
  Tools: Python, Machine Learning, Network Security, REST APIs, Streamlit
  - Developed ZapShield as a solution to a **Smart India Hackathon (SIH) 2025 problem statement** for preventing electrical hazards and equipment damage.
  - Designed a fault detection system to monitor real-time electrical parameters and identify uneven voltage, current fluctuations, and abnormal power conditions.
  - Implemented an automated power cut-off mechanism that instantly disconnects the supply upon detecting faults.
  - Applied data analysis and threshold-based logic to minimize false triggers and ensure accurate fault identification.

Technical Skills

- **Programming Languages:** C++, Python, SQL, JavaScript
- **Web Technologies:** HTML5, CSS3, Flask, Streamlit, REST APIs
- **Database Systems:** MySQL, SQLite, MongoDB
- **Data Science & Machine Learning:** Pandas, NumPy, Scikit-learn, TensorFlow, Keras, Matplotlib, Seaborn
- **Specialized Area:** NLP, Data Visualization, Predictive Modeling, API Integration
- **Other Tools & Technologies:** VS Code, Postman, Anaconda, Tableau, Power BI

Hackathon Participation

- **National Hackathons:** Participated in Smart India Hackathon, SIH 2024, focusing on AI-driven solutions for real-world challenges.
- **University Hackathons:** Took part in multiple university-level hackathons to enhance rapid prototyping and teamwork under time constraints.
- **Key Learnings:** Strengthened problem-solving skills, collaborative development, and practical application of machine learning techniques.

Certifications

- **Data Visualization** *Issued: Jan 2025*
- **Certifying Body:** Coursera (University of Illinois Urbana-Champaign)
- **Algorithmic Toolbox** *Issued: Feb 2025*
- **Certifying Body:** Coursera (University of California San Diego)
- **Object-Oriented Data Structures in C++** *Issued: Mar 2025*
- **Certifying Body:** Coursera (University of Illinois Urbana-Champaign)
- **Peer-to-Peer Protocols and Local Area Networks** *Issued: Apr 2025*
- **Certifying Body:** Coursera (University of Colorado System)
